<u>Project Name</u>	CRM Application for Jewel Management
<u>Maximum Marks</u>	

CHAPTER-2

IDEATION PHASE

2.1- PROBLEM STATEMENT:

The purpose of this project is to develop a **dedicated CRM application** that empowers jewellery businesses to manage customer relationships, inventory, and sales processes with precision and efficiency. In an industry where personalization, trust, and timely service are paramount, this system aims to:

- **Centralize customer data** to enable personalized service and loyalty tracking
- **Automate inventory and order management** to reduce manual errors and improve operational speed
- **Enhance communication** between customers and staff through integrated messaging and follow-ups
- **Provide real-time insights** into sales trends, customer behaviour, and product performance
- **Support scalability** for growing businesses by offering modular and customizable features

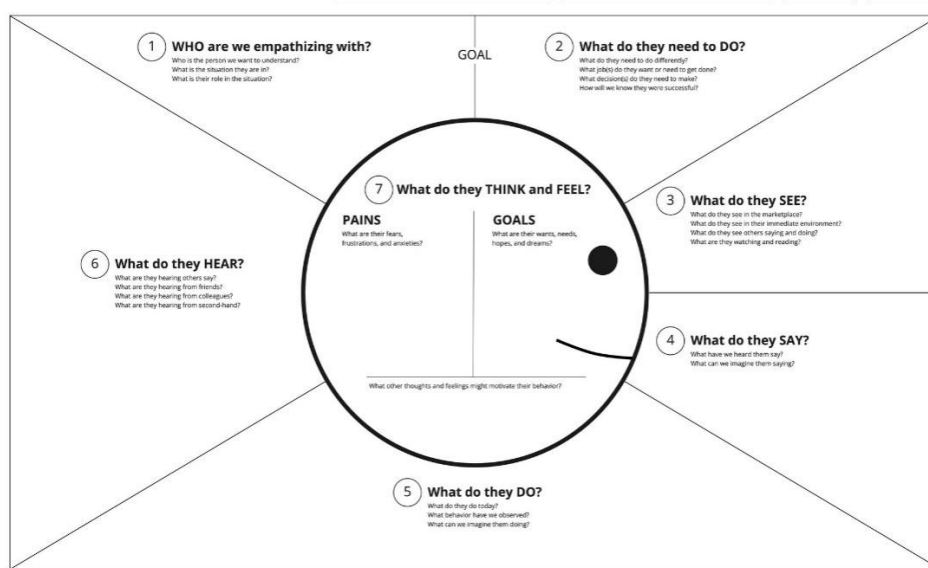

2.2 EMPATHY MAP CANVAS :

An **Empathy Map Canvas** is a powerful tool used in design thinking and user centred development to gain deeper insight into your target audience. It helps teams visualize what a user **thinks, feels, says, and does**, so they can design products and services that truly resonate.

CRM APPLICATION FOR JEWEL MANAGEMENT

2.3- BRAINSTORMING:

💬 What Might Users Say?

- “I want to track my jewellery purchases easily.”
- “I need reminders for maintenance or cleaning services.”
- “Can I get personalized offers based on my preferences?”

🤔 What Might Users Think?

- “Is this app secure enough for my personal data?”
- “Will I get loyalty rewards for frequent purchases?”
- “I hope the staff remembers my style and past orders.”

🤖 What Might Users Do?

- Browse collections frequently but hesitate to buy
- Visit stores after receiving promotional messages
- Share wishlist items with friends or family

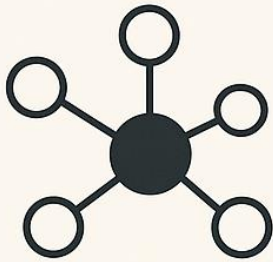

💖 What Might Users Feel?

- Excited when discovering new designs
- Frustrated by poor follow-up or stock issues
- Valued when receiving personalized attention

🔍 Brainstorming Techniques You Can Use

Technique	How It Works
Mind Mapping	Start with “Jewellery CRM” at the centre and branch out to features, users, etc.
Brainwriting	Team members write ideas silently and pass them around for expansion
Starbursting	Ask “Who, What, Where, When, Why, How” about each feature or user need
SWOT Analysis	Identify strengths, weaknesses, opportunities, and threats of your CRM idea
Reverse Thinking	Ask “How could we make the user experience worse?” to uncover hidden pain points
