CHAPTER-3

REQUIREMENT ANALYSIS

3.1 JOURNEY MAP :

This map outlines the key stages a customer goes through when interacting with a jewellery business using a CRM system—from discovery to loyalty.

Stage	Customer Actions	Touchpoints	Customer Emotions	CRM Features Involved
Awareness	Browses online, sees ads, visits store	Website, social media, storefront	Curious, intrigued	Lead capture, campaign tracking
Consideration	Compares designs, checks reviews, asks queries	Product catalogue, reviews, chat support	Interested, cautious	Product info management, live chat logs
Purchase	Selects item, completes transaction	POS system, e-commerce checkout	Excited, confident	Sales automation, inventory sync
Post-Purchase	Receives item, gives feedback	Delivery updates, feedback forms	Satisfied, reflective	Feedback tracking, order history
Loyalty	Returns for new purchases, joins loyalty club	Email campaigns, loyalty rewards	Valued, connected	Customer segmentation, personalized offers
Advocacy	Recommends to others, posts reviews	Social media, referral programs	Proud, enthusiastic	Referral tracking, review management

3.2 SOFTWARE REQUIREMENT :

☑ Functional Requirements

These define what Salesforce should do for your business:

- **Customer Relationship Management**
 - Create and manage customer profiles
 - Track interactions, preferences, and purchase history
 - Loyalty program integration

- **Inventory Management**
 - Real-time stock updates for jewellery items
 - Barcode/RFID tagging support
 - Alerts for low stock or high-demand items
- **Sales & Billing**
 - Automated invoice generation
 - Discount and tax handling
 - POS system integration
- **Order & Repair Tracking**
 - Manage custom orders and repair workflows
 - Status updates and notifications
- **Marketing Automation**
 - Email/SMS campaigns
 - Lead nurturing and personalized offers
- **Analytics & Reporting**
 - Dashboards for sales, inventory, and customer behaviour

⚙ Non-Functional Requirements

These define how the system performs:

- **Performance**
 - Fast page load times and smooth navigation
 - Recommended: Octane 2.0 score $\geq 30,000$
- **Scalability**
 - Support for growing data and user base
- **Security**
 - Role-based access control
 - Data encryption and audit trails
- **Usability**
 - Intuitive UI for jewellers and staff
 - Mobile-friendly interface
- **Maintainability**
 - Modular design for easy updates
 - Clear documentation for admins and developers

📄 Technical Requirements

These specify the hardware, software, and network setup:

Category	Recommended Specs
RAM	Minimum 8 GB (3 GB available for Salesforce tabs)
Network Latency	≤ 150 ms for optimal performance
Download Speed	≥ 3 Mbps recommended
Browser	Latest versions of Chrome, Firefox, Safari (IE11 not recommended)

CRM APPLICATION FOR JEWEL MANAGEMENT

Screen Resolution	Minimum 1024×768 for full feature support
JDK (for APIs)	Java Developer Kit version 8.0 or later

3.3- DATA FLOW DIAGRAM :

3.4- TECHNICAL STACK :

Technical Stack Components:

Layer	Technology / Tool	Purpose
Platform Core	Salesforce (Multitenant, Metadata-Driven)	Foundation for data model, security, APIs
Backend Logic	Apex (Triggers, Classes, Batch Jobs), SOQL/SOSL	Custom business logic and data processing
User Interface	Lightning Web Components (LWC), Aura, Experience Cloud	Responsive and portal UI for tenants/managers
Automation Tools	Flow Builder, Scheduled Flows, Approval Processes	Automate processes like renewals, reminders
