CRM Application for Jewel Manager

Salesforce

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud.

So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organised something like this:

<https://youtu.be/r9EX3IGde5k>

Object

Create Jewel Customer Object

The purpose of creating a Jewel Customer custom object is to store and manage information about Customer.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on

Create >> Click on Custom Object.

2. Enter the label name >> Jewel Customer

3. Plural label name >> Jewel Customers

4. Enter Record Name Label and Format

☐ Record Name >> Customer name

☐ Data Type >> Text

5. Click on Allow reports.

6. Allow search >> Save.

The screenshot shows the Salesforce Object Manager interface for the 'Jewel Customer' object. The top navigation bar includes the Salesforce logo, a search bar, and various utility icons. The main header displays 'SETUP > OBJECT MANAGER' and 'Jewel Customer'. A left sidebar lists configuration options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, List View Button Layout, Restriction Rules, and Scoping Rules. The 'Details' section is active, showing fields for Description, API Name (Jewel_Customer__c), Custom (checked), Singular Label (Jewel Customer), Plural Label (Jewel Customers), Enable Reports (checked), Track Activities (checked), Track Field History, Deployment Status (Deployed), Help Settings, and a link to Standard salesforce.com Help Window. 'Edit' and 'Delete' buttons are in the top right corner.

CRM Application for Jewel Manager

Create Item Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on

Create >> Click on Custom Object.

1. Enter the label name >> Item

2. Plural label name >> Items

3. Enter Record Name Label and Format

1. Record Name >> Item Id
2. Data Type >> Auto Number
3. Display Format >> Item-{00}
4. Starting Number >> 1

2. Click on Allow reports.

3. Allow search >> Save.

The screenshot shows the Salesforce Object Manager interface for the 'Item' object. The top navigation bar includes the Salesforce logo, a search bar, and various utility icons. The main header indicates the path 'SETUP > OBJECT MANAGER' and the object name 'Item'. A left sidebar lists various configuration options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, List View Button Layout, Restriction Rules, and Scoping Rules. The 'Details' section is currently selected and expanded, showing a list of fields: Description, API Name (Item__c), Custom, Singular Label (Item), Plural Label (Items), and a checkbox for 'Enable Reports' which is checked. On the right side of the 'Details' section, there are checkboxes for 'Track Activities' and 'Track Field History', both of which are unchecked. Below these, there are sections for 'Deployment Status' (showing 'Deployed') and 'Help Settings' (with a link to 'Standard salesforce.com Help Window'). At the top right of the 'Details' section, there are 'Edit' and 'Delete' buttons.

CRM Application for Jewel Manager

Create Customer Order Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.

1. Enter the label name >> Customer Order

2. Plural label name >> Customer Orders

3. Enter Record Name Label and Format

1. Record Name >> Customer Order No
2. Data Type >> Auto Number
3. Display Format >> Order - {0000}
4. Starting Number >> 1

4. Click on Allow reports.

5. Allow search >> Save.

The screenshot shows the Salesforce Setup interface for the 'Customer Order' object. The top navigation bar includes the Salesforce logo, a search bar, and various utility icons. The main header displays 'SETUP > OBJECT MANAGER' and 'Customer Order'. A left sidebar lists configuration options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, List View Button Layout, Restriction Rules, and Scoping Rules. The 'Details' section is active, showing a form with the following fields: Description, API Name (Customer_Order__c), Custom (checked), Singular Label (Customer Order), Plural Label (Customer Orders), Enable Reports (checked), Track Activities, Track Field History, Deployment Status (Deployed), Help Settings, and Standard salesforce.com Help Window. 'Edit' and 'Delete' buttons are located in the top right corner of the details section.

CRM Application for Jewel Manager

Create Price Object

The purpose of creating a Item object is to manage the inventory of gold and silver items.

To create an object:

1. From the setup page >> Click on Object Manager >> Click on

Create >> Click on Custom Object.

1. Enter the label name >> Price

2. Plural label name >> Prices

3. Enter Record Name Label and Format

1. Record Name >> Item Price

2. Data Type >> Text

4. Click on Allow reports.

5. Allow search >> Save.

CRM Application for Jewel Manager Schema Builder

Schema Builder is a powerful tool within Salesforce that allows you to visualise, explore, and design the relationships between objects in your Salesforce organisation. It provides a graphical representation of the data model, making it easier to understand the structure and connections between different objects.

Creating Schema Builder

1. Go to setup >> click on Object Manager >> Schema Builder.
2. Select objects >> Enter Objects as “Jewel Customer,Item,Customer Order, Price, Billing objects” in quick box and select them.

Creating the Field Dependencies

Use case:

Field Dependencies are used to create relationships between fields within an object.

They allow you to control the visibility and availability of fields based on the values selected in other fields.

1. Go to setup >> click on Object Manager >> type object name(Item) in quick find bar >>click on the object.
2. Click on Fields & Relationships and click on the Priority field.
3. Search for Field Dependencies and click on New.

CRM Application for Jewel Manager

4. Select Controlling Field as “Priority” and Depending field as “Expected Days of Return”? Continue.

5. Select the “Expected Days of Return” values of related Priority values and Click on Include Values >> Save.

The screenshot displays the Salesforce Setup interface for the 'Priority' custom field. The left sidebar shows the navigation menu with 'Fields & Relationships' selected. The main content area shows the 'Custom Field Definition Detail' for the 'Priority' field. The 'Field Information' section includes fields for Field Label, Field Name, API Name, Description, Help Text, Data Owner, Field Usage, Data Sensitivity Level, and Compliance Categorization. The 'General Options' section includes checkboxes for 'Required' and 'Default Value'. The 'Picklist Options' section includes a checkbox for 'Restrict picklist to the values defined in the value set' and a 'Controlling Field' dropdown. The 'Picklist Values Used' section shows the number of active and inactive picklist values.

Creating the validation rule :

Creating the validation rule for Postal Code field in Jewel Customer object

Note : check whether the fields mentioned in the formula field are created or not , if not go to activity 10 and create those fields mentioned in Jewel Customer object.

1. Go to setup >> click on Object Manager >> type object name (Jewel Customer) in quick find bar >> click on the object.
2. Click on the validation rule >> click New.
3. Enter the Rule name as “Postal Code “.
4. Insert the Error Condition Formula as : -

```
AND(  
OR(  
LEN( Zip_Postal_code__c )<> 6,  
NOT(REGEX(Zip_Postal_code__c, "^[0-9]{6}$"))  
),
```

CRM Application for Jewel Manager

NOT(ISBLANK(Zip_Postal_code__c))

)

5. Enter the Error Message as “Must contain 6 digits”, select the Error location as Field and select the field as “Zip/Postal code”, and click Save.

The screenshot shows the Salesforce Setup interface for the 'Jewel Customer' object. The 'Validation Rule Detail' section is active, showing the following configuration:

Field	Value
Rule Name	Postal_Code
Error Condition Formula	AND(OR(LEN(Zip_Postal_code__c) <> 6, NOT(REGEX(Zip_Postal_code__c, "[0-9]{6}"))) NOT(ISBLANK(Zip_Postal_code__c)))
Error Message	Must contain 6 digits
Error Location	Zip/Postal code
Created By	vignesh.D, 6/14/2025, 7:18 AM
Modified By	vignesh.D, 6/14/2025, 7:18 AM

NOTE:Create One more Validation rule for Jewel Customer object.

1. Enter Rule name as “ValidationRuleForJewelCustomerObject “.

2. Insert the Error Condition Formula as : -

*OR(ISBLANK(City__c) , ISBLANK(Country__c),ISBLANK(Phone__c
,ISBLANK(State__c),ISBLANK(Street__c)*

3. Enter the Error Message as “Please fill Required fields”, select the Error location as Top of Page and click Save.

The screenshot shows the Salesforce Setup interface for the 'Jewel Customer' object. The 'Validation Rule Detail' section is active, showing the following configuration:

Field	Value
Rule Name	ValidationRule_For_JewelCustomerObject
Error Condition Formula	OR(ISBLANK(City__c) , ISBLANK(Country__c) ISBLANK(Phone__c) ISBLANK(State__c) ISBLANK(Street__c))
Error Message	Please fill Required fields
Error Location	Top of Page

Page Layouts

To Create a Gold Page layout

1. Go to Setup >> Click on Object Manager >> Search for the object (Item) >> From drop down click on Edit.
2. Click on Page layout >> Click on New.
3. Give Page layout Name as “Page Layout for Gold” and click on Save.
4. Arrange the field as shown in the Information Section ,remove fields which are related to Silver and click Ok.
5. Click Save.
6. Make sure your page layout looks like the picture above.

The screenshot displays the Salesforce Page Layout Editor for the 'Item' object. The left sidebar shows the navigation menu with 'Page Layouts' selected. The main area shows the 'Page Layout for Gold' configuration. The 'Fields' section is expanded, showing a table of fields to be added to the layout. The 'Item Sample' section shows the layout preview, including the 'Highlights Panel' and 'Quick Actions in the Salesforce Classic Publisher'.

Section	Field Name	Field Type	Priority	Field Name	Field Type	Priority
Section	Customer Name	Text	1	Owner	Text	2
Blank Space	Expected Days Of ...	Text	3	Parity	Text	4
	Gold Price	Text	5	Parity Gold Price	Text	6
	Amount	Text	7	Stone Weight	Text	8
	Created By	Text	9	Record Type	Text	10
	Item Id	Text	11	Total Weight	Text	12
	Making Charges	Text	13			
	Prices	Text	14			

Item Sample

Highlights Panel

Customize the highlights panel for this page layout.

Quick Actions in the Salesforce Classic Publisher

Actions in this section are currently inherited from the global publisher layout. You can [override the global publisher layout](#) to set a customized list of actions for the publisher on pages that use this layout.

Salesforce Mobile and Lightning Experience Actions

Actions in this section are predefined by Salesforce. You can [override the predefined actions](#) to set a customized list of actions on Lightning Experience and mobile app pages that use this layout. If you customize the actions in the Quick Actions in the Salesforce Classic Publisher section, and have saved the layout, then this section inherits that set of actions by default when you click to override.

CRM Application for Jewel Manager

To Create a Silver Page layout

1. Go to Setup >> Click on Object Manager >> Search for the object (Item) >>

From drop down click on Edit.

2. Click on Page layout >> Click on New.

3. Give Page layout Name as “Page Layout for Silver” and click on Save.

4. Arrange the field as shown in the Information Section ,remove fields which are related to Gold and click Ok.

The screenshot displays the Salesforce Setup interface for configuring a page layout for the 'Item' object. The left sidebar shows the navigation menu with 'Page Layouts' selected. The main content area is titled 'Page Layout for Silver' and includes a 'Fields' section with a table of fields to be included in the layout. The table has columns for 'Section', 'Field Name', and 'Field Type'. The fields listed are: Customer Name, Item Type, Ornament, Priority, Silver Price, Weight, Expected Days Of ..., KDM, Owner, Purity, Silver/Other Price, Amount, Gold Price, Last Modified By, Percentage, Purity Gold Price, Stone Weight, Created By, Item Id, Making Charges, Prices, Record Type, and Total Weight. Below the table, there are sections for 'Highlights Panel', 'Quick Actions in the Salesforce Classic Publisher', and 'Salesforce Mobile and Lightning Experience Actions'. At the bottom, there is an 'Item Detail' section with buttons for 'Edit', 'Delete', 'Clone', 'Change Owner', 'Change Record Type', 'Printable View', 'Sharing', 'Sharing Hierarchy', and 'Edit Labels'.

Section	Field Name	Field Type
	Customer Name	Item Type
	Ornament	Priority
	Silver Price	Weight
	Expected Days Of ...	KDM
	Owner	Purity
	Silver/Other Price	
	Amount	Gold Price
	Last Modified By	Percentage
	Purity Gold Price	Stone Weight
	Created By	Item Id
	Making Charges	Prices
	Record Type	Total Weight

Permission Sets

Creating permission set

A permission set is a collection of settings and permissions that give users access to various tools and functions. Permission sets extend users' functional access without changing their profiles. Users can have only one profile but, depending on the Salesforce edition, they can have multiple permission sets.

1. Go to setup >> type “permission sets” in quick search >> select permission sets >> New.
2. Enter the label name as “Per to Worker”, API will be auto populated >> save.
3. Under Apps Select object settings.
4. Click on Items object >> click on Edit >> under Item: Record Type Assignments, enable Gold, Silver >> Object permission check for read ,edit and create.
5. Click on Save.
6. After saving the permission click on the Manage assignment
7. Now click on the Add Assignment.
8. Now select the users which you have created in user milestone, using Worker profile and click on Next >> Assign >> Done.

The screenshot displays the Salesforce Setup interface. On the left, a navigation sidebar shows 'Setup' with a search bar containing 'users'. The main content area is titled 'Permission Sets' and shows the configuration for a permission set named 'Per to Worker'. The 'API Name' is 'Per_to_Worker'. Below this, there are sections for 'Apps', 'Object Settings', 'App Permissions', 'Apex Class Access', 'Visualforce Page Access', 'External Data Source Access', and 'Flow Access'. The 'Apps' section is currently expanded, showing 'Assigned Apps' and 'Assigned Connected Apps' settings. The interface includes standard Salesforce UI elements like a top navigation bar with 'Setup', 'Home', and 'Object Manager' tabs, and a bottom status bar.

Trigger

NOTE : create “Paid Amount”, “Paying Amount “ fields before create trigger.

Creating Currency(Paid Amount) Field in Billing Object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name (Billing) in quick find bar >> click on the object.
2. Now click on “Fields & Relationships” >> New.
3. Select Data type as “Currency” and click Next.
4. Enter Field Label as “ Paid Amount” and length as “ 18 ”and decimal” 0 “.Field name will be auto generated.
5. Click Next >> Next >> Next >>Save .

Creating Formula(Paying Amount) Field in Billing Object

1. Go to setup >> click on Object Manager >> type object name (Billing) in quick find bar >> click on the object.
2. Now click on “Fields & Relationships” >> New.
3. Select Data type as “Formula” and click Next.
4. Give Field Label and Field Name as “Paying Amount” and select formula return type as “Currency” and Decimal as ”2 ” and click next.
5. Under Advanced Formula write down the formula :Total_Amount__c - Paid_Amount__c
6. click “Check Syntax” and Next >> Next >> Save & New.

CRM Application for Jewel Manager

Create a Trigger Handler class

Trigger handler:

A trigger handler is a design pattern that organises trigger logic into separate classes.

This helps in keeping code organised, reusable, and easier to maintain. The trigger handler class contains methods that handle the specific logic for different trigger events, improving code structure and readability. This approach is particularly useful for complex triggers or projects with multiple triggers, as it promotes modular coding practices and reduces the chances of code duplication.

1. Click the Gear icon >> click on Developer Console >> File>>New >>Apex class.
2. Give name for your new Apex class as “UpdatePaidAmountTriggerHandler>>”ok”.
3. Paste the code given below.

CODE:

```
public class UpdatePaidAmountTriggerHandler {  
  
    public static void handleBeforeInsert(List<Billing__c>newBillings) {  
        for (Billing__cbilling :newBillings) {  
            billing.Paid_Amount__c = billing.Paying_Amount__c;  
        }  
    }  
  
    public static void handleBeforeUpdate(Map<Id, Billing__c>oldBillingsMap,  
        List<Billing__c>updatedBillings) {  
        for (Billing__cbilling :updatedBillings) {  
            Billing__coldBilling = oldBillingsMap.get(billing.Id);  
            Decimal oldPaidAmount = oldBilling.Paid_Amount__c;  
            billing.Paid_Amount__c = oldPaidAmount + billing.Paying_Amount__c;  
        }  
    }  
}
```

CRM Application for Jewel Manager

Create the trigger :

1. Click the Gear icon >> click on Developer Console >> File>>New >>Apex Trigger.
2. Give name for your new Apex class as “UpdatePaidAmountTrigger>>”ok”.
3. Paste the code given below.

CODE:

```
trigger UpdatePaidAmountTrigger on Billing__c (before insert, before update) {  
    if (Trigger.isInsert) {  
        UpdatePaidAmountTriggerHandler.handleBeforeInsert(Trigger.new);  
    } else if (Trigger.isUpdate) {  
        UpdatePaidAmountTriggerHandler.handleBeforeUpdate(Trigger.oldMap,  
            Trigger.new);  
    }  
}
```

Flows

Create a Flow

1. Go to setup >> type Flow in quick find box >> Click on the Flow and Select the New Flow.
2. Select the Record-triggered flow and Click on Create.
3. Select the Object as a “Billing” in the Drop down list.
4. Select the Trigger Flow when: “A record is Created or Updated”.
5. Select the Optimise the flow for: “Actions and Related Records” and Click on Done.
6. Now change the mode from Auto-layout to free-form.
7. Now select the manger option in the toolbox, click New resource.
8. Select the resource type as text template.
9. Enter the API name as “ Email body”.
10. Change the view as Rich Text >> View to Plain Text.
11. In the body field paste the syntax that is given below.

Hello

Customer Name: {!\$Record.Item__r.Customer_Name__r.Name}

Here are the details for the item you purchased with Jewelry Inventory System

Item Type: {!\$Record.Item__r.Item_Type__c}

Ornament: {!\$Record.Ornament__c}

Weight: {!\$Record.Weight__c}grams

Amount: {!\$Record.Amount__c}

12. Click done.
13. Now click on elements, and drag the action element into the preview pane.
14. Their action bar will be opened in that search for “ sendemail ” and click on it.
15. Give the label name as “ notice”
16. API name will be auto populated.

CRM Application for Jewel Manager

17. Enable the body in set input values for the selected action.

18. Select the text template that was created.

19. Include Recipient Address list, select the email form the record.

{{!\$Record.Item_r.Customer_Namer.Email_c}}

20. Include the subject as “Welcome to Jewelry Inventory System ”.

21. Click done.

22. Now drag the path from the start to the action element.

23. Click on save. Given the Flow label , Flow Api name will be auto populated.

24. And click on save and click Activate.
